- 60 Mile/97km - 386,068

DELTA Work Ready Community

JOB TRAINING TO FIT YOUR NEEDS

While Mississippi ranks #1 in competitive cost for labor, quality is what brings industry to our state and to our county. Here in Washington County, your operation will reap the gains of the powerhouse partnership between the Washington County's Workforce Investment Network (WIN) Jobs Center and Mississippi Delta Community College (MDCC) Charles C. Capps Technology Center.

From CDL's and PLC programming to Customer Service and Craft skills, the Workforce Education Division of MDCC, the Capps Technology Center is another tool in your arsenal of overcoming the demands and obstacles that you face. Working alongside the WIN Center, the Capps Center will provide rapid responses in the form of customized, quick turn-around training that can result in nationally recognized certifications and other job readiness skills that you require. Should you not know the solution; the Capps Center can consult with you and formulate one.

Whether you have a well vetted curriculum or need one located or developed, your specifications are the driving force behind the Capps Center training. When Mars Foods expanded its production lines with new, cutting-edge equipment in 2007 and 2011, MDCC and Capps made the difference. As Renea M. Weathington, Mars Foods North America human resources manager noted, MDCC and Capps training "has positively impacted machine/process downtime, improved production capabilities, quality, and reduced waste." Furthermore, in October 2014, Mars Foods announced its third expansion, a \$31 million project which increased capacity and included a state-of-the-art Research and Development Application Center to support the company's global innovation efforts.

Should you want to start anew or expand, our workforce development professionals will help your operation achieve breakthrough performance. In a short period of time you will become aware of one fact; it is not that you can afford to do business here, but that you can't afford not to!
